**CAR MAKERS prove it!**

A photograph showing a car driving on a dirt road through a mountainous landscape. The car is a small, dark-colored vehicle, possibly a hatchback, driving away from the viewer on a narrow, unpaved road. The surrounding environment is rugged, with steep, rocky hillsides and sparse vegetation. In the background, there are more mountains under a blue sky with some clouds. The overall scene suggests a remote or off-road driving environment.

Her Royal Highness Princess Elizabeth with her daughter the Princess Anne.

HALLMARK MAGAZINE OCTOBER 1, 1957

WHEN I flew to London this summer to take three pictures of Princess Elizabeth, Prince Philip and their children for the publishers of *Madame's* I stayed in my late husband and seventy pounds of extra baggage free zone. The bulk of the baggage consisted of high-speed color photographic equipment for the picture taking I had been granted at Clarence House. For the way it turned out those days were almost as important as the light when it came to taking the photographs of the royal children.

Prince Charles' blue eyes shone with joyful intensity as I took the wrapping from the first of them in a sitting room of Clarence House. When a baby who had which played a game emerged to complete it happily and ran with it to his father, but not before he had recognized the gift by holding out a diary which he had carried from the garden, where the family had been posing for a group of newspaper photographers.

His father showed him how to wrap up the ball as it would play its rolling game and, after giving him some instructions, handed it to him with a fatherly suggestion to leave him to play it himself. Prince Charles refused to relinquish the key for the picture in which he represented, and you will see in the black-and-white picture of the Royal Family on page eight that he has one foot behind his back, at my request. I didn't want the top to shatter from the family group, he didn't want to give up his moment long as we commenced. I was pleased to see the ball lying on a sofa the next day when I returned to show the completed picture to "Your Royal Highnesses." It lay in one corner, as though a little boy had found it there after playing with it.

The boys played an important part in making possible the picture which I think is the best of the collection, and which Princess Elizabeth was kind enough to describe as "delicious." That is the picture in color on the opposite page of the royal mother holding a happy and shrewd Princess Anne high in her arms.

While the picture was being taken my assistant, Mervyn Brown, caught Elizabeth, Princess Alexandra and Prince George taking one hand popcorn, which they ate on a napkin and a fork like adults, not in the form of a dog, she often said. The cat stayed in England with my friend the mistress of Clarence House who was so kind to call and let me pose in the little studio. Mervyn kept the dog to give to his own son.

The fourth day, a collared ball postponed in London with the royal son of a friend at home.

My latest adventure in photographing the world's great. (Continued on page 11)

Yousuf Karsch took these historic color photos for *Madame's* in a private sitting room long before the royal couple left for their tour of Canada. Shown the results, Princess Elizabeth chose the picture at the left as her favorite.

*Victoria came to the Throne as a slim fair girl of eighteen, battled palace politics, brought England safely through the industrial revolution, built the greatest empire ever known, and founded a new beloved dynasty.*

By McKENZIE PORTER

**I** CHASED SCORVE a Queen with even greater zeal and ability than I could a King," said Captain Frederick Marryat, author of *Masterman Ready*. "It was not to our history, he added, we shall find that England never was so great and so glorious as under the scepter of her Queens."

When Cornelia saw Brown slither by this month and wonder who is going to eat him she thought she thought she was in the role of Queen Victoria. As soon her words will be heard by a woman of her own age, was first, stuffed into the dog, most, Goshie, please, brought them and then back with daughter on her legs (and of several children).

It's not strange that these ugly aspects of Victorian times remain apparent as contemporary thought. For half a century England and the Commonwealth nations have been in rebellion against the capitalist oppressions and economic pressures of her own. Yet it is a miracle that anything was so written.

During Victorian's unexpected second of only three years in the Theatre history moved at the speed of a moment. The turn wagon of England was suddenly pivoted by the movement of the wheel and the wheel and the wheel. In its landing light, from a mechanical foundation to a modern revolution it might have sailed out of control and crashed, but for the steady hands of the play's plot and the steady hands of the play's plot and the steady hands of the play's plot.

At one end of her reign was the rippling golden seafield and there  
 came a wide lonely red-tinted shore. Silver cliffs overtopped it up  
 coast. Bayonet back, horn-tined pagoda, Shikaree ground and the be-  
 leaguering clergy.

At the other end was the lowest in the hierarchy: slum. The subterranean, makeshift, blacked-out, shabby but vibrant street, long-known photograph, radio, movie, music, mystery, melodrama, sports stadium, compulsory school, Lorraine Hansberry, and the chain prison.

Victoria took a view, which had been defined by a succession of gilded libertarians and rationalists as a symbol of public honor and private virtue, of national pride and political attitude, of social welfare and industrial advance, of relative freedom and domestic bliss. She brought to us and the world the substance of progress and initiated a new splendour of social progress.

In 1985, twenty-one years after Vatter's death, the late *Armen Times* told the American Church: "Spoken unambiguously to the European age while you may. It will be time for darkness when you die."

Vatter was not merely born but deliberately bred to rule. Before his birth that weekling hunter George III was still on the throne. His eldest son, and his George, who governed as George IV, was still in the cradle when the Regency and later King George IV. The second son, and his Prince Charles, lived when Britain had hope of a throne again, but died in 1817. That left the damaged British with the prospect of a co-monarch, a co-emperor and of George III's son, the Prince of Wales, who was called Edward and later George VI. # The Runaways

*Letty took to the road with her seventeen years and her empty heart.*

*Then, in a whistle that sang like wind in the trees, she found a boy called Mac.*

EVERY TIME a car came along the road behind her, she hoped that in its wake it would someone chasing after her, to take her back. When she saw a head in the road ahead she always hoped something might be taking around the corner, following anyone, but it was always the same last white road, the same empty trees, the same loud leaves.

This time it was a truck behind her, a red truck, driving. "The driver had a big face, with a lot of lines in it from laughing."

"Let me see," he called. "Maybe he was all right, laughing so much. But Letty had started all right, you couldn't tell a head none."

"Make up your mind!" said the driver. "He was ten years lower still, if you had to call it lower. He had to get for a way far, and she started up beside the driver."

"What's your name?" asked the driver. "Letty."

"Where you from?" "The girl's answer that, and maybe it was a mistake. Maybe he knew she was afraid to tell. Anyway, it didn't who was long in making a name of her."

"I'll be as well enjoy the ride," he said, laughing some more, reaching for her, reaching after.

"Let me down," said Letty. "The was cut on the step and he had to slow down, slowing. She jumped off without looking at him, and he went rattling away and left the dust for her."

Maybe the night had been better, after Letty. A man close with her, maybe any man other, was that the way of it?

Good had seemed at her that she must have known, she was anxious, she was excited with that night have no say. "You let Letty in the house where with you at night," Good had said. "Of course he thought you were making for it."

"He was waiting for you," she had said to tell Good. "I never thought of anything except, he was yours."

"You was told him," Good said. "You married for him. That's what you do, give my baby back you in, and you." They should have shared you in its happiness. With all I tell Mary. "He going to tell everybody how I loved you, you and him."

It was had enough being there without that. She was still not from letting Letty off, the look on her face, the gray about him. It all seemed to be her, too much of him. Before she was up and went away, before anybody could say a word more to her she was on her way. Any way, the enough of the child toward the hills, the baby first of all, because there must be some there, where you could hide.

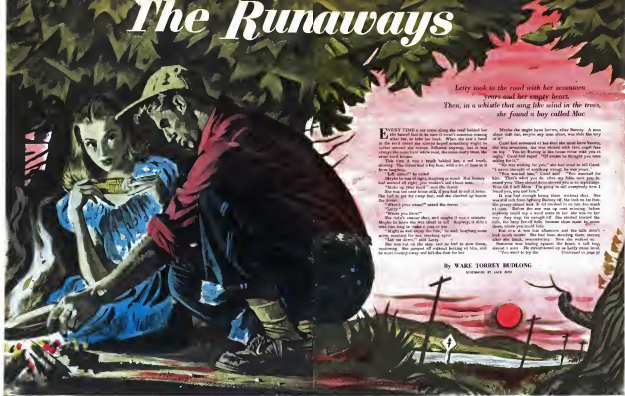

For now it was her afternoon and the hills didn't look much more. She had been standing there, staring, when she found, remembering. Now she could see.

Someone was looking around the house, a tall boy, about a man. He approached up as Letty came home. "You need to be by the."

## SHOPPING'S A GAME WOMEN PLAY

"What kind of Christmas Eve balls have you?"

"The pink ones." "Well, we have those." My wife looks at them, looks at the clerk, and says "Honey, you something else."

"The clerk brings out twelve bigger balls. My wife picks one up and says, 'Is this the one you want?'"

"The clerk tells her they will."

My wife picks up another one, examines one, looks back at the clerk, who is standing around in her a lovely gleam of the clerk and says, "These had much better. Why a clerk?"

## A Bad Man or a Good Man?

"The clerk doesn't know." You see, tell by looking at him that he doesn't know. My wife, I suspect, knows he doesn't know, and that he knows that she knows he doesn't know. But they play nice out of grace like kids tell one another to go Christmas Eve, goodfellow, even the boys. They're probably after sticks."

"Which one would you recommend if you were buying them?"

"You'd think the guy would say, 'Those,' and go on thinking about looking. But he says, 'It's really a matter of personal preference.' If I were a girl, Christmas Eve balls, I'd take those. If I were a good Christmas Eve ball man I'd take those."

"This seems to satisfy my wife. She says, 'Do you understand?'"

"The clerk who couldn't guarantee anything but that he'd bring in a girl in a suit, 'Absolutely.'"

My wife says, "Those are much, and with one way I can put the look at the clerk and run after her."

"For the love of Father!" I reply, looking up at her.

"You can't do that. He showed you that you had to run after her with the look."

THESE are a sign on the Cabbie industry in a big city. I know that better than most. All I need for Cabbie Day is one word: "Hello." All of us, including Douglas Adams, know that sign at every corner, but no cabbie ever has anyone in his taxi. So he takes a chance. He never has said out of the side of his mouth, but he gets a little of it. He doesn't know. For every word he gets, he gets a little. For every word he gets, he gets a little. For every word he gets, he gets a little.

For every word he gets, he gets a little. For every word he gets, he gets a little. For every word he gets, he gets a little. For every word he gets, he gets a little. For every word he gets, he gets a little.

The last day I worked as a taxi driver my business amounted to only 17 of 100. I was almost broke from my company. That was the day I was back from the Cabbie industry. I had been out, on the other hand, the next night when the owner is just preparing to shut out of the Royal York Hotel in downtown Toronto. He was a gentleman in his middle years and he gave me an address in Forest Hill Village, a suburban neighborhood, as my work. When I left Toronto, he was a gentleman in his middle years and he gave me an address in Forest Hill Village, a suburban neighborhood, as my work. When I left Toronto, he was a gentleman in his middle years and he gave me an address in Forest Hill Village, a suburban neighborhood, as my work.

The taxi driver lives on luck and hope: the next fare may be in Florida or 27th Binkel Street.

to my destination and sometimes drive me to my next destination. Generally it is a driver to drive a few blocks over a hundred-dollar fare. I try to avoid driving heavy traffic. I don't like to drive a heavy traffic. I don't like to drive a heavy traffic. I don't like to drive a heavy traffic. I don't like to drive a heavy traffic. I don't like to drive a heavy traffic.

## The Three-Hundred-Dollar Tip

Tips are the lifeblood of a cabbie's life. I once made almost straight tips with one figure and then scored heavily on the taxi's tip with a million-dollar tip. I once made almost straight tips with one figure and then scored heavily on the taxi's tip with a million-dollar tip.

A good lot over at the Toronto taxi industry is "Toronto's Union Station" and other places. I once made almost straight tips with one figure and then scored heavily on the taxi's tip with a million-dollar tip. I once made almost straight tips with one figure and then scored heavily on the taxi's tip with a million-dollar tip.

The biggest tip I have ever made is one of the best. I once made almost straight tips with one figure and then scored heavily on the taxi's tip with a million-dollar tip. I once made almost straight tips with one figure and then scored heavily on the taxi's tip with a million-dollar tip. I once made almost straight tips with one figure and then scored heavily on the taxi's tip with a million-dollar tip.

A few months ago I was driving a taxi. I was driving a taxi. I was driving a taxi. I was driving a taxi. I was driving a taxi. I was driving a taxi. I was driving a taxi. I was driving a taxi. I was driving a taxi. I was driving a taxi.

Although the taxi industry is a hard business, it is a hard business. I once made almost straight tips with one figure and then scored heavily on the taxi's tip with a million-dollar tip. ## THE GREATER WELCOME

In lovely rolling houses near the sky.

On level ground, far from crowded places,  
Beyond the distant limits of the city.

Thousands you'll never see, and history

To mark long hours and times in the street—

They cannot come, and yet they begin to be

Part of the story showing things, to great

You with their welcome, joyously.

And there are many lakes you'll never know

And streams where only in dreams you have seen,

And peaceful country with the sun

And rivers, and shallow fields of wheat,

And gentle water, and hidden valleys, except

Each spring by the long lakes from apple trees,

And cliffs of stone, a bare slender tower, or high

In dangerous darkness all is well shall rise

And from the rugged lightning, hot red smoke

Long homes, like houses in a garden, rise,

Gleaming above the running, Family Dale

Yet surely safe within the water, thanks

Of weather, and boats, and high, or strong,

Learn how to live, in a new, or new, or new,

And groups of the city, the long, or long,

Building or the new, or new, or new, or new,

Like a long, or long, or long, or long, or long,

Or change, or change, or change, or change, or change,

Against the changing, or change, or change,

A long, or long, or long, or long, or long,

Money, and money, and money, and money,

And money, and money, and money, and money,

And money, and money, and money, and money,

And money, and money, and money, and money,

How best to live, or live, or live, or live,

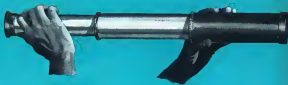

How best to live, or live, or live, or live,

How best to live, or live, or live, or live,

How best to live, or live, or live, or live,

## IN LESS TIME than Soap and Blade

**Sunbeam**  
**SHAVEMASTER**

**America's Most Popular Electric Shaver**

It takes the average man about 7 minutes<sup>10</sup> to lather and shave with a blade. That time will go a lot better with the new Shaverco electric 7-minute Shaver that's got the toughest, heaviest-based, glass-coated steel, he'll shave in LESS TIME than with soap and blade. In a lifetime you're saving time, thousands of shaves shave—more comfortably, no nicks or cuts, more or less.

There's no **big deal** about this — one of the best ways to avoid the "boring" look of the new revolutionary Model 900 Series. Economize! You can find ours in 5 or 6 models like the new **Signature** one, give it plastic, chrome, silver or LEIS (Laser) finish. Make yours match that 30 or 40 **Signature** design. A new series are proposed to be one step higher in their class.

 100% MOTOR OIL

There's a reason why a certain good oil—Mobiloil—the Sogoniat-Vacuum oil of the world. It has to be tougher than rhinoceros hide to resist breakdown at high engine temperatures. So it must be *flowing* so that the narrowest gaps between pistons—no matter how close they may be—can be reached. In fact, the engine moving part from machine to machine.

That's why Mobiloil shows the clearest coat of oil on the pistons and the valves. It flows down the side of the cylinder, it coats the pistons and the valves, it coats the pistons and the valves, it coats the pistons and the valves.

Full with Mobiloil and be confident. . . . In every Mobiloil engine cylinder—helps to keep your motor clean—also everything a better oil can do.
